Hi Qicheng,

Your free plan for Cursor is now active. Thank you for trying out the editor.

Here are a few things you can try in Cursor:
- Type and press Tab to accept an autocomplete or a suggested diff from Cursor Tab
- Open Agent in Chat to make multi-file edits and hand off simpler tasks
- Select 20 lines of code and press Cmd+K to make an inline edit

You can find more tips in the docs.

Feel free to shoot any questions or thoughts to our forum.

Best,
The Cursor Devs

If you don't want to hear from me again, please let me know.
