SDE III, FireTV

Job ID: 2966218 | ADCI - Karnataka

DESCRIPTION

The Amazon Fire TV team designs and engineers the best-selling and devices for Fire TV product Line.

You can be part of a fast-paced, agile and innovative team who is bringing new multi-modal, integrated voice with GUI, experiences to FireTV in a startup like environment.

Key job responsibilities
The Amazon Fire TV team designs and engineers the best-selling and devices for Fire TV product Line.

You can be part of a fast-paced, agile and innovative team who is bringing new multi-modal, integrated voice with GUI, experiences to FireTV in a startup like environment.

We are looking for passionate, hard-working, and talented engineering leaders who have experience building innovative, mission critical, high volume applications that customers love. This is a high visibility team where you will get a chance to make a positive impact on customer experience.

Amazon FireTV products are revolutionary consumer devices that have become the #1 best-selling Amazon products. They are among the most innovative and fastest growing businesses at both Amazon and the entire consumer electronics industry. We are looking for talented software engineers to join our team in building application software. This is an enormous opportunity to lead the design, architecture, and implementation of products used every day by people you know.

A day in the life
We are looking for passionate, hard-working, and talented software engineers who have experience building innovative, mission critical, high volume applications that customers love. This is a high visibility team where you will get a chance to make a positive impact on customer experience.

About the team
